

Extensive Research Leads Pharmacy Owner to ScriptPro

Eric's Pharmacy

Thousands of pharmacies rely on the SP 200 Robotic Prescription Dispensing System to improve patient safety.

Eric Winegardner opened Eric's Pharmacy in 1995 with the goal of being the premier pharmacy in Oklahoma.

"I didn't want to be like everyone else, I wanted this store to be better, faster, and friendlier. We put a high value on counseling, and all patients, whether they are picking up a new prescription or a refill, are counseled by a pharmacist.

"I painstakingly researched pharmacy automation systems for a year and a half before deciding on ScriptPro. During that time I visited dozens of stores, looking at what worked for other pharmacies, compared systems, and talked to owners. I decided on ScriptPro for my pharmacy.

"I have never regretted getting ScriptPro. Automation is a big part of our workflow that helps free up the pharmacists to practice pharmacy. That means our pharmacists have time to share their knowledge with our patients and other medical professionals.

"The customer service at ScriptPro is unique in the industry. When we call in, the technicians help us right then and there; we never hear 'I'll have to call you back.'

"The inventory management with the robot frees up money because we know at all times what stock we have on hand and what we need to order. **We get 18 to 24 inventory turns per year on the drug stock in the SP 200.**

Eric's Pharmacy Customer Since 2006

Pharmacy Type: Independent
Prescription Volume: 300 per day
Location: Shawnee, OK

"In the years since using the ScriptPro robot we have been very impressed with the counting accuracy and have never seen it choose the wrong product.

"We just opened a 4,000 square foot, state-of-the-art pharmacy that took us four years of planning. Our ScriptPro system is with us, filling about 50% of our 300 to 600 prescriptions per day."
