

SP 200 stabilizes staffing costs at Amicare Pharmacy

Robotic arm counts and fills without cross-contamination.

Thousands of pharmacies rely on the SP 200 Robotic Prescription Dispensing System to relieve their workload.

Stabilize Staffing Costs

“The number one benefit from getting ScriptPro technology is that even though our numbers continue to grow, we haven’t added staff since 2001. With pharmacists’ salaries at the level they are now, it is very cost effective to consider an SP 200.

“We chose ScriptPro because we were so impressed with their customer service. We never wait for someone to answer a call—they answer right away no matter what the time. ScriptPro has proven that it is a customer-focused company.

“The SP 200 is a good product; it does exactly what they say it will do. The safety factor of the SP 200 is very important as well, especially with drugs that have similar names. The machine doesn’t mix them up as a human being might.

“We have a whole lot less stress with the SP 200. Pharmacists are free to counsel because they are away from the mundane counting and pouring tasks. And we have more time to be creative with value-added services like coagulation monitoring.”
