

SP Central Retail Store Package

SP Central Retail Store Package is a pre-engineered hardware and software platform incorporating **SP Central Pharmacy Management System**, **SP Datapoint**, **SP Printer**, and **SP Central Retail Store Server**. It provides centralized system management, prescription data processing, and workflow optimized for small and medium sized retail pharmacies.

SP Central Pharmacy Management System allows you to monitor and track your operations from point of entry to point of sale. The included SP Datapoint supports touchscreen access to managing data entry, claim and DUR processing, exception routing, inventory management, filling and verification, and more. SP Printer produces high-quality direct thermal prescription labels and interfaces with ScriptPro's SP Central software to ensure filling accuracy and safety.

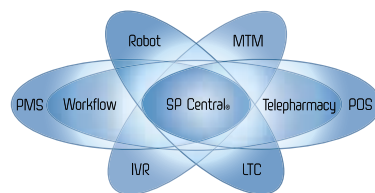

SP Central Retail Store Server supports dedicated data backups via secure electronic file transfer protocol (SSH), as well as manual backups, depending on your pharmacy's needs. With the server's system-wide image storage functionality, you can store millions of prescription hard copy, insurance card, and inspection images.

SP Central Retail Store Package gets you started—and additional ScriptPro products can be seamlessly integrated into the platform.

SP Central Retail Store Package includes the following:

SP Central Retail Store Server
(Rackmount option also available.
See reverse for specifications.)

ScriptPro® Perfect Integration.

SP Central Pharmacy Management System

SP Datapoint*

SP Printer*

SP Central Retail Store Server

A. Desktop Retail Store Server

B. Rackmount Retail Store Server

Specifications*

Weight: A. 133 lbs (60.2 kg)
 B. 108 lbs (49 kg)

Electrical Input: 100-240 VAC, 50/60 Hz, 5.8-2.9 AMP, 1 Phase.
 Dedicated outlet located within 5 ft (1.5m) of power connection.

Communications: Serial, parallel, or ethernet pharmacy computer connection. Firewall provided for network connectivity.

Remote Support Requirements: VPN over high-speed internet connection. Also requires access to backup analog RJ-11 telephone outlet accessible to outside line and capable of sending and receiving calls.

Computer/Software: Client/Server system on ScriptPro-installed network; Pentium Xeon quad-core processor server. TCP/IP socket connections; Software built with Visual C++; Microsoft SQL back end, Windows Server 2003. Secure FTP/SSH. Redundant server capability and redundant data and transaction log backups with RAID 1 data protection. Customer access limited to SP Central user interface.

Image Storage Capacity (Based on 300 new prescriptions/day and 300 days/year): 1 hard copy prescription/1 insurance card image per prescription saved for a minimum of 10 years.

Temperatures:
 Required Operating: 68°F to 75°F (20°C to 22°C)
 Storage: 5°F to 104°F (-15°C to 40°C)
 Dissipated Heat: 2,300 BTU/HR max
 Required Humidity: 45-55%
 Altitude: Up to 9,843 ft (3000m)

Static control and room thermostat must be provided by customer.

Server Clearance: 3 feet optimal

Supports up to 24 clients. Up to 3 SP Station, SP Checkpoint, or SP Datapoint clients may operate remotely (outside 300 ft radius from server). Up to 20 non-ScriptPro computers may access the system remotely using Remote Access licenses and a Remote Access Server. Remote clients must meet network requirements. See network and connectivity specifications.

Supports peak prescription processing load of 200 prescriptions per hour.

Peripheral Products Supported:
 See product sheet on peripheral products

Rackmount Form Factor:
 Primary Server: 3U
 Backup/Image Server: 3U
 UPS: 2U (optional)
 KVM Tray: 2U (optional)

Rackmount Color: Black face; plated metal body

Rack Support: Compatible with standard EIA 19" four-post rack. Mounting rails provided by ScriptPro (rack provided by customer or purchased from ScriptPro). Two-post racks require a customer-supplied shelf with adequate support.

Rack must be grounded per local codes; customer must provide room thermostat and non-carpet flooring extending 3 feet from edges of rack.

Support Platforms: SP Central Pharmacy Management System

Training: Up to sixteen Full Time Equivalent (FTE) training days included with original lease/purchase. Approx. seven FTE days for Training and Setup and approx. nine FTE days for Go-Live and Support.

One "FTE" day is defined as one trainer on-site for one day for up to 10 hours. If more than one trainer is on-site, it is counted as multiple FTE days.
