

**SCRIPTPRO IS A PHARMACY TECHNOLOGY COMPANY FOUNDED IN 1994.  
CORPORATE HEADQUARTERS ARE IN THE KANSAS CITY AREA.**

The company's initial product, the SP 200 Robotic Prescription Dispensing System, pioneered the use of robotics in community pharmacies. Today, ScriptPro offers a comprehensive line of over 150 pharmacy automation and management system products that have revolutionized pharmacy operations in the U.S., Canada, and many other countries.

ScriptPro products operate in thousands of independent, chain, hospital, supermarket, and government pharmacies. Many large chain pharmacies have standardized operations around the ScriptPro robotic model. Leading hospitals in the U.S. and around the world use ScriptPro systems to ensure accuracy and patient safety. Over 300 Veterans Administration and public health system hospitals rely on ScriptPro robotics-enabled workflow systems to care for their patients. The Department of Defense deploys ScriptPro telepharmacy equipment at bases throughout the world to make pharmacists available wherever needed.

ScriptPro has grown through invention and product development, rather than through acquisition. It owns the core technologies utilized, and manufactures, sells, installs, and supports all of its products.

ScriptPro has been honored with numerous awards for outstanding service to the pharmacy industry, its customers, and the community. The U.S. Food and Drug Administration uses ScriptPro to provide and operate an internal drug information system, which covers all prescription and over-the-counter drug products available for human use in the United States. ScriptPro also provides emergency dispensing services under the HHS/ CDC Strategic National Stockpile Program.

Mike Coughlin is the founder of ScriptPro, and president and CEO of the company. His vision for "Perfect Integration" for pharmacy systems puts the company at the forefront of the industry.

**AT A GLANCE**
